

Model: CB300 Ceiling base for 230V alarms

The CB300 pattress complete with relay contacts, acts as the universal surface mounting facility for 230V mains smoke and heat alarms. Its specific application is where a BRK smoke or heat alarm is required to operate with a remote telemetry system or ancillary device such as an automatic door release.

Product features:

- Low profile for a neater installation
- Mains and interlink connections
- Colour coordinated to match the alarm
- Easy to fix
- Robust ABS design
- 2 x 20mm top entry knock-outs
- 1 Side entry knock-out for mini trunking
